The PSN manager database is one of North America’s longer-running databases of investment managers. PSN Top Guns ranks products in six proprietary categories in over 50 universes and is a well-respected quarterly ranking widely used by institutional asset managers and investors. PSN Top Guns performance rankings are tabulated for thousands of strategies across 75 peer groups subdivided by increasingly rigorous screens and reported in ascending classes from 1-6 stars. Distinct rankings are created for Separate Accounts, Managed Accounts and Managed ETF products.

Top Gun firms are awarded a rating ranging from one to six stars, with the number of stars representing continued performance over time.

**Bull & Bear Masters:** These products had an r-squared of 0.80 or greater relative to the style benchmark for a three-year period. Moreover, products must have an upside market capture over 100 and a downside market capture less than 100 relative to the style benchmark. The top ten ratios of Upside Capture Ratio over Downside Capture Ratio become the PSN Bull & Bear Masters.

**5-Star Category:** These products had an r-squared of 0.80 or greater relative to the style benchmark for the recent five-year period. Moreover, products must have returns greater than the style benchmark for the three latest three-year rolling periods. Products are then selected which have a standard deviation

for the five-year period equal or less than the median standard deviation for the peer group. The top ten returns for the latest three-year period then become the 5 Star Top Guns.

4-Star Category: These products had had an r-squared of 0.80 or greater relative to the style benchmark for the recent five-year period. Moreover, returns must have exceeded the appropriate style benchmark for the three latest three-year rolling periods. The top ten returns for the latest three-year period then become the 4 Star Top Guns.

3-Star Category: These products had one of the top ten returns for the three-year period in their respective universes
